SYNTHETIC DATA PORTFOLIO PROJECT

Payments Data Migration

Go-live readiness: legacy to modern core banking

100,000
payments in scope, ACH and wire

17
SQL reconciliation rules

4,010
exceptions found in the trial load

The net total looked fine. The payments did not

Net variance, target minus legacy

-$4.45M

On $18.18B, a 0.02% gap. A net-only tolerance check would pass it.

Gross error hiding behind it

$203.2M

$103.8M in 400 payments missing from target

$52.6M in 300 duplicated payments

$46.8M in 200 payments with no legacy source

Source: trial load 1 reconciliation, 100,000 legacy payments. Synthetic data adapted from PaySim.

4,010 exceptions across ten defect types

Defect	Rule	Records	Severity
Payments missing from target	R01	400	**Critical**
Fraud flag lost in conversion	R10	10	**Critical**
Amounts rounded to whole dollars	R04	800	High
Routing number blank	R08	500	High
Pending shown as settled	R09	400	High
Duplicate payment IDs	R03	300	High
Settlement date off by one day	R07	300	High
Records with no legacy source	R02	200	High
Date written as MM/DD/YYYY	R06	600	Medium
Account numbers truncated	R05	500	Medium

Source: trial load 1. Every seeded defect was detected, with no false positives.

Rehearsal 2 reconciles to zero

Measure	Trial load 1	Rehearsal 2
Target rows	100,100	**100,000**
Distinct payment IDs	99,800	**100,000**
Amount variance	-$4,452,155.93	**$0.00**
Reconciliation exceptions	4,010	**0**
Failed test cases	11	**0**
Open defects	10	**0, all retested**

Rehearsal 2 applies the corrected conversion logic: ISO dates, explicit status lookups, full-length account numbers and unique keys.

Source: trial load 1 and rehearsal 2 reconciliation runs, QA workbook.

RECOMMENDATION

Conditional go: UAT sign-off is the last gate

All reconciliation rules and API tests pass. 11 of 14 requirements are Pass, 3 are Pending UAT.

Payments Operations reviews the ranked exception report	Compliance spot-checks all 122 fraud-flagged payments	Finance Controller signs off the control totals
TC-28, not run	**TC-29, not run**	**TC-30, not run**

Open decision: how to treat 33,815 merchant (M-prefix) beneficiary accounts.
